Introducing the

# ECOBURN PLUS GAS STOVE

*Get the look of our Ecoburn Plus wood burning stoves without the need to refuel!*

One of the main reasons for choosing a gas stove is **convenience**. The hand-held remote control allows for **easy operation**, so you can adjust the heat output and flame picture from the comfort of your sofa. The **Ecoburn Gas** runs on natural gas and has a **battery-powered ignition**, so there is no need for installation near an electrical outlet.

See overleaf for specifications >

**Includes:**  
Remote Control as standard

Ask a retailer or visit our website for further information.
