

GAZCO

Fire Your Imagination

Gas and Electric Stoves

A Warm Welcome

Nothing creates an inviting atmosphere quite like a Gazco stove. The centrepiece of any home, it will add warmth and character to any room or living space – even if you don't have a chimney! Whether you want to achieve a minimalist, contemporary look, or have your heart set on a more traditional stove, this brochure will help you make the perfect choice, whatever your interior tastes.

From the highly efficient contemporary Gas Loft range with all its style and elegance, to the stunning cast iron detail on traditional Huntingdon stoves, these innovative designs will appeal to any modern or traditional home.

There is also a range of highly realistic, electric log-effect stoves featuring either Gazco's Chromalight® or VeriFlame™ technology. These electric versions open up new possibilities such as conservatories, kitchens, dining rooms and bedrooms for you to have the warmth and character of a Gazco stove in your home.

Relax – it's a Gazco stove

When you choose Gazco, quality and innovative technology are assured. From traditional models to contemporary designs, Gazco is committed to creating the ultimate flame-effect gas and electric stoves.

Our research and development laboratories are amongst the most advanced in the world, ensuring that the very latest innovations are incorporated into our appliances.

Gazco is an ISO9001 and ISO14001 accredited company. Our rigorous quality control system ensures that all our appliances are safety checked and that they comply with the appropriate regulations, with all stoves in this brochure bearing the CE mark. Similarly, our environmental management systems ensure we work in a sustainable manner, whilst endeavouring to protect the environment by minimising any possible impact from our operations.

With over 30 years of proven experience building quality Gas fires, you can be confident that when you select a Gazco fire, you are getting the best of British design, engineering and manufacturing.

Warranty

Your Gazco Expert Retailer will provide you with a Two Year Warranty for your new gas or electric stove. The warranty for gas stoves can be extended to a period of five years by registering your stove with Gazco. Please note, these warranties exclude certain consumable parts. Stoves purchased outside of Gazco's Expert Retailer Network will carry a standard One Year non-extendable Warranty. Full warranty terms & conditions are available to view at www.gazco.com.

Selecting Your Stove

Before you choose your new stove you will need to know what type of chimney (if you have one) or flue you have. Please turn to pages 8 - 9 to identify your chimney or flue type.

Expert Retailer Network

We take great care to ensure that our stoves are designed, tested and manufactured to the highest possible quality and safety standards. We are just as concerned to make certain that they are sold and installed correctly so that you enjoy years of pleasure from your purchase.

Accordingly, you will find our products are only available from experienced, independent retailers who will be happy to show you a selection of models locally in their showrooms, often fully operational. These independent retailers will discuss your individual requirements both technical (such as sizing the heat output to your room and advising on your flue type) and design, and ensure that you select the most appropriate product for your home. These retailers will also be able to advise on, or assist with, the installation process as well as help provide any after-sales support and servicing your appliance may require in the future.

Whilst we encourage our retailers to promote fireplace products and their outlets via the internet, we do not believe suitable levels of customer care and satisfaction can be obtained from purchasing the product only online and we would strongly recommend that you consider this when undertaking your research and making a purchasing decision. Furthermore, please be aware that we do not offer technical support (beyond our statutory responsibilities) to products bought via nationwide online sales, where this support would normally be offered by one of our qualified, independent retailers.

Furthermore, Gazco fires and stoves purchased from within our Expert Retailer Network will have the additional benefit of a greatly extended warranty period, subject to terms and conditions. Full details can be found at www.gazco.com.

Find Your Retailer

You can find your nearest retailer by visiting www.gazco.com/find-a-retailer

What's your type?

Before you select your stove, your local Gazco retailer will need to make sure it's suitable for your home. Firstly, you need to know what fuel type you will be using. Secondly, you will need to be aware of what type of chimney or flue you have. If you do not have a chimney then don't worry, Gazco have models developed to suit your home too! To assist you in selecting the right stove for your home, a general guide to which models can be installed with the various flue types is given on each page.

Fuel - Gas or Electric?

The majority of our stoves are available in either gas or electric versions. All the electric models run on a standard 13amp plug and have no need for a chimney.

Which Gas type....

All Gazco gas stoves in this brochure can be specified for use with either Natural Gas or LPG. Natural Gas is provided through mains pipelines, whilst LPG is usually supplied to homes in rural areas from a tank in the garden or gas bottles.

Your Home...

The type of chimney or flue you have usually dictates your choice of stove. To help you understand which stoves are suitable for your home, please use the information and pictures shown opposite to identify your chimney. Don't worry, if you don't have a chimney though, you can still find the perfect stove for your home. Once you have identified your chimney(or confirmed you do not have one), take note of the symbol that represents this, as this has been used throughout the brochure to represent the stoves that are suitable for installation in your home.

Conventional Flue

Conventional flue systems are easily recognisable as either a conventional brick or stone chimney, pre-fabricated or precast chimney system. Should your home have none of these at present, it is usually possible to have a pre-fabricated system installed in your home if required.

Brick or Stone Chimney
(Class 1) **1**

The chimney stack rises well above the roofline and is topped by a traditional chimney pot or gas terminal. This type of chimney relies on the natural circulation of heated air to expel the products of combustion up your chimney.

Pre-Fabricated Flues
(Class 1 & 2) **2**

You will see a metal flue cowl on your roof. Some are all metal whilst others may terminate through a short rectangular pot (but without a chimney stack). These flues create the same circulation of heated air as a brick or stone chimney.

Pre-Cast flues
(Class 2) **3**

Many modern homes have been built with such flues. You can readily identify them by either a metal flue cowl or a raised ridge terminal on your roof. Again, the natural circulation of heated air expels the products of combustion. This option is only available on the small stoves.

Balanced Flue

Balanced flues work in conjunction with Gazco's Glass Fronted gas stoves. The appliance is completely sealed from the room into which it is installed (so there are no draughts and heating efficiency is increased) and a twin-wall pipe vents directly to an outside wall.

Balanced Flue
(No chimney required) **BF**

Air for combustion is drawn in through the outer pipe whilst the inner pipe removes the combustion gases to the exterior of the property. Depending on the stove selected, the twin-walled pipe may exit horizontally through an external wall or vertically through the roof. Gazco offers a comprehensive range of balanced flue system components. Please refer to our dedicated Concentric Flue System brochure which can be requested from your retailer or viewed online at www.gazco.com.

Electric Stoves
(No chimney required) **⚡**

Gazco produce an excellent selection of electric Marlborough2, Stockton, Huntingdon, Steel Manhattan and Vision stoves which do not require a chimney or flue of any kind.

No Air Vent required (UK) **⊗**

All stoves shown with this symbol, boast the advantage of not normally requiring an air vent* where the air permeability is greater than 5.0m³/hr/m². Please discuss this in full with your local Gazco retailer.

*Requirements in the Republic Of Ireland are different.

Gas Marlborough2

Country or city, traditional or contemporary, the innovative Gas Marlborough2 has the flexibility to suit your lifestyle and your décor. Available in two sizes, each has an expansive window area to allow you to enjoy the dancing flames and warm ambience of the log-effect fire.

Operation is simple thanks to the easy ignition and manual control which lets you adjust flame height and heat output. Choose Gazco's Command upgradeable remote control and you can adjust the flames and heat from your armchair. Alternatively, opt for the Programmable upgradeable remote control to set the stove to switch itself on and off and heat the room to the temperature you select.

Electric Marlborough2

Featuring the same distinctive styling as the Gas Marlborough2 shown on the preceding pages, the two electric versions offer you an amazingly realistic log-effect fire at the touch of a button. At its heart is Gazco's unique VeriFlame™ technology which allows you to choose from two heat settings that can both be thermostatically controlled; three flame brightness levels, plus the additional option for a blue flame effect on the high setting. Furthermore, the flame effect can be displayed without heat, allowing you to enjoy your fire all year round.

The Electric Marlborough2 stoves simply plug into a 13amp socket, so are particularly suited for conservatories, bedrooms or home studies, in fact any room without a chimney.

* The thermostat is controlled manually from the stove.

Gas Stockton2

Using cast iron for the door and heavy gauge steel for the body, Gas Stockton2 stoves combine simple, understated lines with Gazco's superb living flame technology.

Both Small and Medium sizes provide superior flames, with carefully positioned flame ports ensuring a varied and natural display amongst the hand painted logs.

Stockton2 stoves can be upgraded with either a Standard or Programmable Thermostatic remote control if desired, and are available in either conventional or balanced flue versions to suit a variety of installations.

Electric Stockton

Electric Stockton2 Medium in Matt Black

Electric Stockton2 Small in Matt Black

Using the same cast iron door and heavy gauge steel body as the Gas Stockton2, the electric version combines the classic looks of a woodburning stove with the ease of Gazco's unique VeriFlame™ technology. This means you can enjoy two heat settings that can both be thermostatically controlled; three flame intensity levels, plus the additional option for a blue flame effect on the high setting to create a remarkably authentic log-effect fire - a superb focal point for any room. Choose from the Stockton2 Small, Stockton 5 or the Stockton2 Medium.

Gas Huntingdon 20

Gas Huntingdon 20 with Tracery Door in Matt Black, shown with Belgravia polished cast front from Stovax.

The compact Gas Huntingdon 20's proportions make it perfect for British fireplace openings, whilst its highly efficient 2.5kW heat output easily creates a warming atmosphere in standard sized rooms. Producing dancing flames over a realistic log fuel bed, this stove is offered with Standard and Programmable Thermostatic remote controls, providing real fire ambience at the touch of a button.

Presented in either Matt Black, Matt Ivory or Ivory enamel finishes, the Huntingdon 20 lets you choose a colour that best suits your home. Further expanding the styling options available, this elegant stove is also offered in both clear door and tracery versions.

loft

gas stove range

Clear-cut lines and sleek surfaces ensure the Loft's pure design creates a striking focal point in your interior.

Reflective black glass frames the stove's tall firebox, subtly contrasting with the matt steel body. Soaring flames dance amongst a highly realistic fuel bed, composed of hand painted logs. Visuals are mirrored on all sides by the EchoFlame™ Black glass lining - a continuation of the stove's glossy exterior styling details.

This premium gas stove is available in either conventional or balanced flue models and provides up to a 4.8kW heat output, which can be effortlessly controlled with the fully sequential Programmable Thermostatic remote control.

Luxurious styling possibilities

Loft stoves can be styled with a variety of accessories, including a choice of luxury stone mounting options. Choose from cleanly styled Plinth and Logstore bases, with either option offered in matching steel, as well as smart Castillo grey sandstone (page 32) or luxurious Woodgrain sandstone (pages 33 & 71).

This versatile stove is also available as a wall mounted version, for an ultra-modern floating installation that lends itself perfectly to contemporary settings.

Regardless of the mounting options selected, this tall stove's height can be accentuated with a striking matching steel top section (see pages 2 and 30), hiding the flue pipe and continuing the stove's clean lines.

Gas Vogue Midi

Gas Vogue Midi Midline conventional flue

Elegantly styled to fit equally well in either contemporary or traditional settings alike, the Vogue Midi gas stoves feature a cast iron door and top plate with refined curves and bevelled edges. For increased presence, Midline models are mounted on a matching log store base that can be used to house chopped logs to add to the woodburning aesthetic.

Creating breathtaking flame visuals, Vogue Gas stoves feature a highly realistic log bed and a polished EchoFlame Black Glass lining that provides a stunning, multi-sided reflection of the flames. Designed with the very latest gas fire technology, these cutting edge stoves provide an ample 3.9kW of heat up to 90.6% efficiency.

For greater convenience, these stylish stoves can be upgraded with a Programmable Thermostatic handset which allows you to pre-set the stove to provide heat at selected times or temperatures.

Gas Vogue Midi T

The versatile Vogue Midi T gas stove range provides stunning flames and a high efficiency heat output of up to 94.3%. Taking the elegant styling of the smaller Midi range (pages 36 -37), the Midi T's bevelled cast iron exterior encases a taller firebox that offers a three-sided view of the impressive visuals.

Vogue Midi T stoves feature a highly realistic log-effect fuel bed which is reflected on multiple sides by Gazco's EchoFlame Black Glass interior. Each ceramic log is positioned to create varied and natural flames almost indistinguishable from a real woodburning fire.

This contemporary stove is also available in Midline (above & page 6) or Highline (left) versions, which feature stylish bases that can be filled with logs to add to the wood fire aesthetic. In addition, the Midi T balanced flue is also available as a wall mounted model (see overleaf).

Electric Vogue Midi

Vogue Midi Midline Electric with Log & Pebble fuel effects and Amber and Blue Accent flame setting

The Vogue Midi range represents the latest innovation in electric stove design, creating deep, captivating, 3D flame effects with incredible realism. Gazco's ChromaLight® Immersive LED technology lets you independently control flame and ember bed lighting effects to create the perfect ambience in virtually any part of the home.

The Vogue Midi is offered in two models including the taller Midline log store version (above), which can be stacked with logs to add to the authentic wood fire display. A choice of fuel beds come with both models including logs, pebbles & crystal-effects, with each stove letting you mix & match to create a bespoke display.

Gazco's Programmable Thermostatic Eco remote provides complete control over the stove's visuals as well as allowing you to schedule heating to suit your lifestyle. Innovative energy saving features ensure the Vogue Midi runs as efficiently as possible.

Gas Vision Medium

Gas Vision Medium

The Gas Vision Medium is one of the larger models in the range with a powerful heat output to match, making it a great choice for installing into expansive inglenook fireplaces or bigger rooms.

Enhancing the view of the fire, the Medium's firebox features mirrored stainless steel sides that reflect the rolling flames and allow them to be viewed from multiple angles.

Along with the other models in the Vision range, the Medium benefits from advanced gas fire technology, and can be upgraded with a remote control or alternatively a Programmable Thermostatic handset for increased functionality.

Electric Vision

Electric Vision Medium

The Vision is a contemporary, electric stove that comes in three sizes: Small, Midi & Medium; each sporting a highly reflective black glass door, integral glass plinth, black glass top plate and stainless steel detailing for a clean stylish look.

Incorporating an eye-catching flame effect created using Gazco's unique VeriFlame™ technology, the Vision's alluring visuals glow over a realistic hand painted log-effect fuel bed to give all the ambiance and depth of a real log fire. To increase your interior design possibilities, you can enhance your Vision by choosing from one of ten stylish stove benches as shown on page 77.

Please see further image on page 77.

Riva2 F670 Glass

Riva2 F670 Glass conventional flue with optional Brick-effect Lining

Combining exceptional aesthetics with the latest gas fire innovations, the Riva2 F670 Glass provides high efficiency heating whilst effortlessly creating a stunning focal point in any setting.

The F670's realistic log-effect fire is complimented by Gazco's EchoFlame Black Glass lining, which enhances the depth of the fire by mirroring the flames on three sides. This lining can be optionally replaced with either Vermiculite, Brick-effect or Black Reeded, for an alternative backdrop to the flames.

See overleaf for the steel fronted version of the F670.

Riva2 F670 Steel

Riva2 F670 Steel conventional flue with optional Vermiculite Lining

Offered in a stylish Graphite steel front, the F670 Steel is an attractive alternative to the Glass model shown on the previous pages and shares all the same firebox technology and lining options.

These innovative gas stoves are capable of producing up to 5.10kW of heat, with an outstanding 82% efficiency, all with easy and convenient operation thanks to the Programmable Thermostatic handset featuring timer and thermostatic temperature controls.

Studio 1 Freestanding Gas

Studio 1 Freestanding balanced flue with White front and matching plinth, Driftwood-effect fuel bed and EchoFlame Black Glass lining

The Studio 1 Freestanding is a designer gas stove with a wide range of styling options, allowing you to tailor your fire to your interior. Available with a choice of either a black or a white steel front, this stylish fire can also be selected with a matching plinth or bench.

In addition to the stove's exterior styling options, the Studio 1 can be configured with a choice of highly realistic fuel beds including Log-effect, Pebble & Stone and Driftwood-effect, which each transform the fire's aesthetic and ambience.

The impressive flame visuals are heightened by the highly reflective EchoFlame Black Glass lining, which enhances the depth of the firebox. Alternatively, additional Vermiculite or Black Reeded linings can be selected should you wish to further customise your Studio 1 Freestanding.

This advanced gas stove is available in either conventional or balanced flue versions to suit your home and features a Programmable Thermostatic handset for full control from the comfort of your armchair.

A larger version, the Studio 2 Freestanding, is shown overleaf.

Studio 2 Freestanding Gas

Studio 2 Freestanding conventional flue with Black front and matching plinth, Log-effect fuel bed and EchoFlame Black Glass lining

The landscape Studio 2 Freestanding offers an expansive flame view and a host of styling choices to suit your interior.

Flame visuals can be tailored with the variety of realistic fuel beds including highly detailed Log-effect, Driftwood-effect or Pebble & Stone. Each bed adds its own character to the Studio 2.

Gazco's shimmering EchoFlame Black Glass lines the Studio 2's firebox, mirroring the flames to enhance the fire's depth and visuals. There is also the option of additional Vermiculite or Black Reeded linings, which can replace the EchoFlame lining if desired.

Similar to the smaller Studio 1 Freestanding on the preceding pages, the Studio 2 can be customised with a black or white steel front, as well as a choice of either matching plinth or bench.

Additional Information

Command remote controls

Gas Stoves

Gazco was the first UK company to introduce remote controls for gas fires. Today, our Command remote control systems allow most stoves to be upgraded, either at the time of purchase or at a later date, with either:

a) Standard upgradeable remote control

Once the pilot light has been ignited manually you can vary the flame height and heat output from the comfort of your armchair.

b) Programmable Thermostatic upgradeable remote control

This deluxe version has two additional features. The first allows you to thermostatically control the room temperature whilst the second allows you to programme your stove to switch itself on and off twice a day.

c) Programmable Thermostatic remote control for Gas Loft, Riva2 F670 and Studio Freestanding

This advanced remote is loaded with exciting features that make it possible to programme your stove to perfectly complement your lifestyle. Not only can you ignite, extinguish and thermostatically control your stove, this remote control system benefits from advanced technology that gives you the option to create an automatic, intelligent heating program that means your home is comfortable and cosy at any time of the day or night.

Electric Stoves

Our range of Electric Stoves are as easy to install as plugging in and switching on! They are available in a range of designs from traditional to modern, to suit all homes and tastes.

The Gazco VeriFlame™ Difference

Stockton, Marlborough, Huntingdon and Vision electric stoves feature VeriFlame™ technology, which provides three flame intensities, as well as a blue flame-effect that can each be selected using the handset.

Stoves with Veriflame technology feature a manual thermostatic heat control for either a 1kW or 2kW output, discreetly concealed on the body of the stove.

The Gazco Programmable Thermostatic Eco Handset

The Vogue Midi Electric stove features Gazco's Eco remote control, which provides complete control over the stove's ChromaLight flame colours and lighting effects, as well as heating and energy saving features. Ambient heating control allows you to set the optimum temperature for your room between 15°C and 25°C, with the Vogue automatically managing heating power to reach the chosen temperature as efficiently as possible. Daily and weekly heating lets you program your stove to suit your lifestyle and can be easily advanced or delayed without disrupting scheduling.

Energy saving features such as Open Window Detection save energy by turning off the heat if a sudden drop in room temperature of 4°C or more is detected, such as when a door or window is opened. Heating can be easily resumed by pressing the heat button again or closing the window.

Lining Options for Riva F670 and Studio Freestanding

The Riva2 F670 and Studio Freestanding stoves come with EchoFlame Black Glass as standard, with a selection of alternative interior lining options that can be added if desired:

Technical Specifications

All specifications given in the main part of this brochure are approximate. Actual specifications for each individual product will vary according to the exact model and are given on pages 65-77. Your Gazco retailer will be pleased to help explain specific model specifications and provide any further information you may require, or you can view/download specification sheets from www.gazco.com.

Installation and Safety

Gazco gas stoves must be fitted by a qualified gas installer (Gas Safe registered in the United Kingdom or Bord Gais registered in the Republic of Ireland) who should also verify the proposed site conditions are fully suitable for the product selected. Complete installation instructions for many models can be obtained prior to purchase by downloading them from www.gazco.com.

Please note that all parts of these stoves become extremely hot during operation and can result in serious injury and burns if touched. It is therefore recommended that a fireguard complying with BS 8423:2002 is used in the presence of young children, the elderly or infirm.

Colours

Owing to variations in studio lighting and printing inks, the colours of stoves illustrated in this brochure may differ slightly from actual models.

Product Improvement & Brochure Photography

Gazco pursue a policy of continuous product improvement, therefore, whilst our products are correct at the time of the photography, we reserve the right to make alterations and amendments. Exact product

details should be discussed with your retailer at the time of purchase.

All fire and flame photography has been taken from genuine products; however, the exact appearance of the flame picture for any appliance will vary depending on the nature of the flue type, installation surroundings, local geographical features and the way in which the appliance is operated.

Given that building regulations are subject to constant change, some of the photography in this brochure may not comply with the requirements of the latest Building Regulations and you should always check your proposed installation arrangement with your qualified gas installer before proceeding. Certain settings in this brochure are dependant on the use of heat shields to reduce the required separation from combustible material.

Please note: The operation and appearance of gas appliances depends on variable factors such as the gas pressure supplied.

Warranty information

Your Gazco Expert Retailer will provide you with a Two Year Warranty for your new gas or electric stove. The warranty for gas stoves can be extended to a period of Five years by registering your stove with Gazco. Please note, these warranties exclude certain consumable parts. Stoves purchased outside of Gazco's Expert Retailer Network will carry a standard 1 Year non-extendable Warranty. Full warranty terms & conditions are available to view at www.gazco.com.

GAS FLUE SYSTEMS

1. Rigid or Flexible Metal Flue^Δ

With this flue system rigid metal tubes, or a combination of rigid and flexible metal tubes, extend vertically directly from the stove to the outside of the property. This may be either straight through the ceiling or roof with the flue pipe exposed, or by using the channel of a chimney or a studwork enclosure. The products of combustion are carried up the flue by natural convection.

Models which can use this system are:

Small and Medium Gas Marlborough2, Small and Medium Gas Stockton2, Gas Stockton 5, Huntingdon 20, Huntingdon 30, Huntingdon 40, Loft, Gas Vogue, Gas Vision Small, Midi, & Medium, Studio 1 and 2 Freestanding and Riva2 F670.

2. Balanced Flue

Where a room has no chimney, then a Balanced Flue version of a Gazco stove is a practical option. The flue consists of one tube inside another. The outer tube brings air into the stove for combustion whilst the inner one emits the products of combustion.

Options: A - Rear outlet (max 600mm wall thickness).

B - Top outlet/up and out (min rise 500mm, max 3m), horizontal (min 250mm, max 5m).

An additional bend can be incorporated in to the horizontal section of the 'up and out', dependent upon a 1m min vertical rise.

C - Top outlet/vertical (min 3m, max 10m). Vogue Midi T / Vogue Midi T Midline (Min 2m, Max 10m)

D - Top outlet/vertical with offset (min to first bend 500mm, max flue length 10m).

Ask your retailer for full technical details or see our Concentric Flue System brochure at www.gazco.com.

Models which can use this system are:

Small* and Medium Gas Marlborough2, Small* and Medium Gas Stockton2, Gas Stockton 5, Gas Huntingdon 20*, 30 and 40, Small*, Loft, Gas Vogue, Gas Vision Small, Midi, & Medium. Studio 1 and 2 Freestanding and Riva2 F670. (*Rear outlet only). All Balanced Flue models are log effect only.

*(Stockton 5 balanced flue 15 1/4" 401mm)

Recommended clearances between stove and other surfaces: top 9" (225mm), sides 6" (150mm), rear must be a minimum of 2" (50mm).

The Stockton has a choice of top or rear flue exit. Small and medium models can be supplied with an optional rear closure plates: Small (**8042**), Medium (**8105**). Small balanced flue stoves are rear exit only.

Stove Flue Pipe

Balanced flue versions of the Gas Stockton must only use the 6" stainless steel flue provided. For additional Matt Black, please see the Gazco Stoves price list. Gazco recommends the use of 5" Matt Black enamelled stove pipe with the conventional flue version. The components required are:

Description	Product Code
1' Straight pipe	4500
2' Straight pipe	4501
3' Straight pipe	4502
90° Long 'elbow' adaptor (9" projection)	4514
Flue collar	8549

Remote Controls for Gas Stockton

Description	Product Code
Standard Upgradeable Remote Control	8455
Programmable Thermostatic Upgradeable Remote	8456

The above information is to assist in your choice of a suitable Gazco stove. This is not intended to be all the information required to install your stove. This can be obtained from your local Gazco retailer or you can download the full installation instructions from the Gazco website at www.gazco.com

Stove Flue Pipes

Balanced flue versions of the Gas Vogue Midi and Midi T must only use the 6" stainless steel flue provided. For additional Matt Black enamelled flue collars, please see the Gazco Stoves price list. Gazco recommends the use of 5" matt black enamelled stove pipe with the conventional flue version of the Gas Vogue Midi and Midi T. The components usually required are:

Description	Product Code
1' Straight pipe	4500
2' Straight pipe	4501
3' Straight pipe	4502
90° Long 'elbow' adaptor (9" projection)	4514
Flue collar	8549

Gas Vogue Dimensions

Recommended clearances between stove and other surfaces: top 9" (225mm), sides 6" (150mm) rear must be a minimum of 2" (50mm).

The complete range of Gas Vogue stoves have a choice of top or rear flue exit.

Vogue stoves can also be placed on one of our ten stove benches. Please see page 77 for further information.

Stove Flue Pipes

Balanced flue versions of the Loft must only use the 6" stainless steel flue provided. For additional Matt Black enamelled flue collars, please see the Gazco Stoves price list. Gazco recommends the use of 5" matt black enamelled stove pipe with the conventional flue version of the Loft. The components usually required are:

Description	Product Code
1' Straight pipe	4500
2' Straight pipe	4501
3' Straight pipe	4502
90° Long 'elbow' adaptor (9" projection)	4514
Flue collar	8549

Loft stoves can also be placed on one of our ten stove benches. Please see page 77 for further information.

This can be obtained from your local Gazco retailer or you can download the full installation instructions from the Gazco website at www.gazco.com

Balanced Flue Gas Stove Systems

The Gazco Balanced Flue system means no chimney is not a problem if you opt for a balanced flue gas stove, as it draws combustion air from outside through its concentric pipe systems. A full range of optional flue components is available to suit configurations shown on page 66.

Gazco have specifically developed a range of flue system components to complement your balanced flue stove. Crafted from 304 grade stainless steel and aluminium with some items additionally offered in anthracite and matt ivory paint finishes. Designed with ease of installation and flexibility in mind, these flue systems simply push together without the requirement for locking bands or screws. Both the inner and outer pipes are secured with easy fit, self locking, high temperature silicone seals. For further information, please speak to your retailer or visit www.gazco.com.

Components for Balanced Flue Models

Basic Stainless Steel Kits	Product Code
Rear exit, horizontal - complete with terminal guard	8526
Top exit, up & out, stoves	8523
Top exit, up & out, F670	8534
Top exit, up & out, Vision Medium	8509
Top exit, vertical	8524
45° offset bend (set of two) for use with 8524	8530
Top exit vertical, Huntingdon 30, Stockton 5, Vision Midi & Vogue	999-539

Have you considered woodburning?

Many of the stoves in this brochure are also available as woodburning and multi-fuel versions. These advanced solid fuel stoves feature the latest cutting-edge combustion systems, for superb flame visuals and heating performance.

Sheraton 5 woodburning Ecodesign stove, with Stovax Cavendish Bolection Limestone Mantel

Stovax, our solid fuel division, offer a huge range of beautiful stoves that burn wood and other solid fuels. Designed and engineered here in the U.K, these appliances offer a natural and practical home heating solution.

State of the art airflow systems ensure these airtight products burn wood and other fuels with high efficiency and low emissions, and we are proud to offer the largest range of solid fuel stoves approved for use in towns and cities in the UK and Ireland.

Choose from a stunning range of modern and traditional styles in various sizes and heat outputs to suit your home. For more details speak with your local retailer or visit www.stovax.com.
