technical data

Morsø glass hearth plates are made from 12mm toughened glass that has a beautifully bevelled edge to give the hearth plate an elegant and exclusive look. Our glass hearth plate range has now been extended to include exciting new designs and finishes. From corner installations to wall mounted stoves, for contemporary or traditional homes, we have the perfect glass hearth plate for you.

All Morsø stoves have been independently tested and proven not to cause the hearth temperature to exceed 100°C.

This accreditation permits Morsø stoves to be installed in conjunction with 12mm thick, non combustible hearth plates that can be sited directly onto any suitable surface including wood floors or even carpet.

Morsø glass hearth plates can be supplied with pre cut holes for stoves with direct air supply. Please call 01788 554410 for further details.
