

feel the warmth

## welcome to a world of comfort and warmth

There's nothing like the feeling you get from a real fire. The sound of crackling logs, the sight of the glowing embers long into the night and the quiet comfort of knowing you're using an efficient Stanley stove to heat your home and saving on fuel bills, now and into the future.

Whether it's unwinding after a long day, relaxing with your favourite book or catching up with friends and family, your Stanley Stove will be there, balancing performance with design style, precision control with build quality.

# your Stanley story starts here

As Ireland's leading stove company we understand that when you bring home a Stanley Stove you are choosing a stove to rely on, from a name you can trust. Based in Waterford since 1934, we are dedicated to ensuring that every stove that bears the Stanley name is of the highest quality.

## in the beginning

From the very moment our Waterford based design team commit their vision to paper our focus is creating stoves that bring control, comfort and warmth to your home. Our design ethos is simple, we connect the past to the future, combining classic style and excellent performance to create iconic stoves that are perfect for Irish homes.

## tried & tested

Before a stove receives the Stanley seal of approval, our research and development team carry out exhaustive safety, quality and performance testing. Measuring heat economy, CO<sub>2</sub> emissions and build durability. Our stove experts ensure that only the best designs are considered for manufacture. Every stove is then independently certified and tested to European BS EN 13240 standard.

## built with pride in Waterford

We believe that every home in Ireland can afford to enjoy the quality of a real Stanley Stove. We search the world for the very best quality materials. In Waterford you'll find the AGA Rangemaster Group's centre of excellence for stove manufacturing. That's why we are proud to say Built in Waterford.

## meet your perfect match

We want to make sure you choose the perfect stove for your lifestyle. Throughout Ireland, home heating experts are available in Stanley retailers to offer advice and guide you in choosing the best stove to suit your needs. Our team in Waterford are also available to answer your queries.

## happily ever after...

Stanley Stoves are at their happiest when they are working hard to keep you warm. From the very moment you welcome your new stove home, your Stanley will be there for you come hail, rain or shine. Strong, reliable and efficient, it is a stove you can rely on. Our customer service team is here to help you in anyway they can, making sure you and your Stanley live happily ever after. It's not the end, it's just the beginning.

All solid fuel stoves are independently tested and carry the HETAS Three Tick badge along with the CE Mark. The external castings on Stanley solid fuel stoves are covered by warranty for up to 5 years (terms and conditions apply).

# why choose a Stanley?

Over 300,000 Irish households have already said yes to the control, efficiency and comfort that comes as standard with a Stanley Stove.

## save money everyday

Three times more efficient than a traditional open fireplace, a Stanley Stove is the affordable and stylish way to reduce your home heating costs. With class leading fuel efficiencies of up to 80%, a Stanley Stove simply produces more heat from less fuel helping you stretch your fuel budget further.

## take control of your home heating

You'll love the freedom and control that a Stanley Stove provides. Packed with features for finger-tip control of your heating, a Stanley Stove is the flexible way to heat your home using a wide range of solid fuels including wood, coal and briquettes. Say hello to more control and good-bye to high home heating bills forever.

## prepared for any weather

If the last few years have taught us anything, it is that we all need to be prepared for whatever the weather may bring us. Come hail, rain or shine, your Stanley Stove will be there for you; providing controllable, efficient heat when you need it.

## a name to trust

As Ireland's leading stove company, every single stove that bears the Stanley name is designed to the highest standards and built to last. Our Stanley retailers are on hand to help you choose the right stove for your home. The Stanley Customer Service Team is always on hand to provide expert support and access to a high range of authentic Stanley accessories and parts.

## advanced features for better performance

-  **Clean Burn Technology** controls air flow in the stove firebox to maximise efficiency.
-  **High Chromium Grates** withstand higher firebox temperatures for a longer lifespan.
-  **Cast Iron Build** holds and radiates heat, giving an even temperature once the stove is lighting.
-  **Quality Fittings** are made from best in class materials and hand built in Waterford.
-  **Dual Position Grates** burn wood logs or smokeless fuels with equal efficiency. (Lismore only)
-  **Superior Grade Enamel** gives a high gloss finish with longer lasting shine.
-  **Thermostatic Controls** control the burn rate based on the temperature of the boiler.

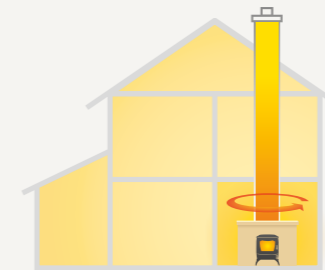

Thanks to Irish Craft Council artist Ronan Halpin for the sculpture featured on the mantelpiece

# transform your home with a Stanley Stove

Open fireplaces push up to 80% of the heat from the fire straight out your chimney. The fireplace creates a powerful draught effect, drawing in cold air from outside into your home. The heat from your open fireplace is uneven, uncontrollable and uneconomical.

Transform your home with a Stanley Stove and say hello to more comfort, more control and a more sustainable way of heating your home. Stanley Stoves are available in two heating options suiting every lifestyle; a Room Heat Only Stove and a Room and Central Heating Stove.

## Room Heat Only

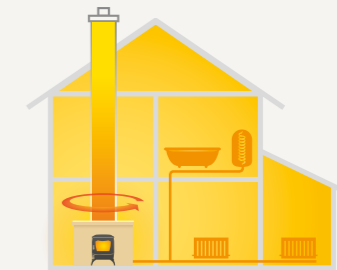

A Room Heat Only Stanley Stove is the ideal replacement for an open fireplace for those who love the atmosphere of a real fire. They improve home heat comfort and efficiency in three ways.

1. Stoves precisely control airflow to the fire. This eliminates the powerful airflow that pushes heat up the chimney causing cold draughts and helps create a more comfortable, controllable living environment throughout the home.
2. A Cast Iron Stove holds and radiates the heat long after a visible fire has died down, providing longer-lasting, more controllable, comfortable heat.
3. When unlit a stove seals the chimney opening, stopping warm air escaping throughout the day.

- Supports central heating
- High efficiency (72% - 81%)
- Greater control
- Radiant heat

## Room and Central Heating

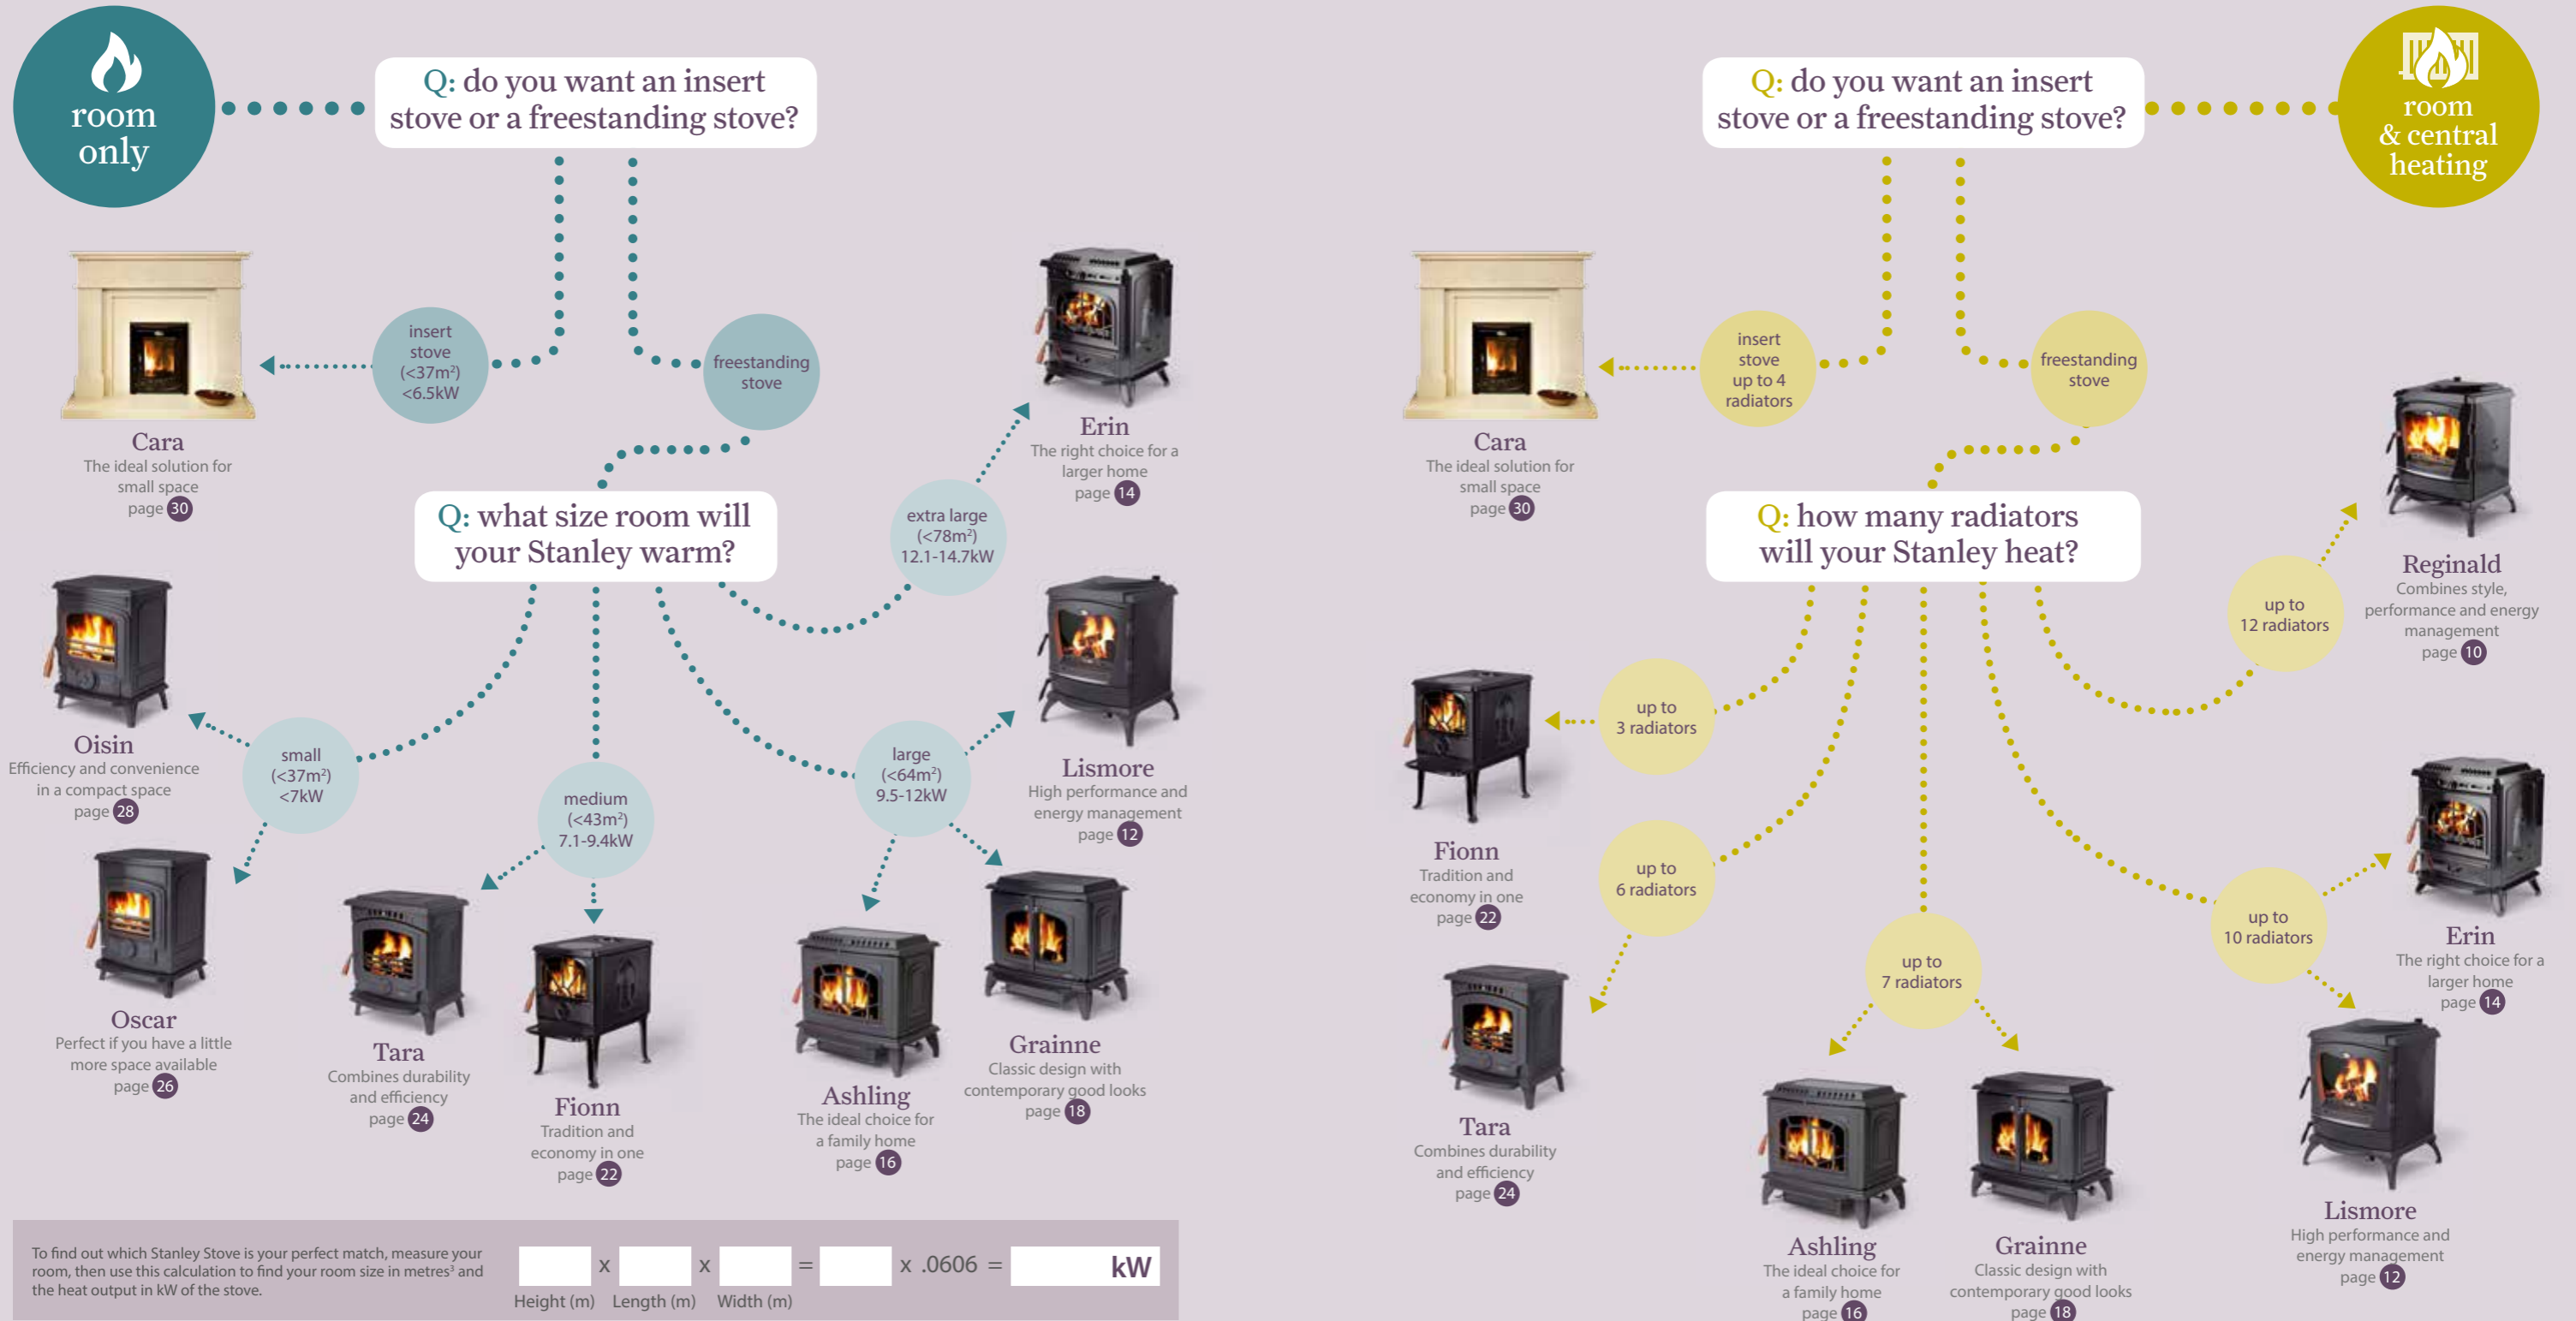

Providing heat to up to 12 radiators, a Stanley Room and Central Heating Stove is a highly flexible home heating solution that offers a choice of configurations to suit your home and lifestyle.

- Enjoy all the benefits of a room heating stove plus:
1. Complete central heating solution that powerfully heats up to 12 radiators, whilst offering hot water and radiant heat to your kitchen or living space.
  2. Stanley Room and Central Heating stoves will integrate with other traditional and renewable heating sources in your home for maximum fuel efficiency.

- Complete, connected, modular system
- High efficiency (72% - 81%)
- High control
- Thermostatic settings

# the perfect match - find the ideal Stanley Stove for your home

start by deciding if you want your Stanley Stove to heat a room or a room and central heating?

# Reginald®

The Reginald sets a new standard for stove design and performance. Behind the sculpted curves, chrome detailing and elegant styling lies a next generation stove designed for a new era in home heating efficiency. As a leader in its class, the Reginald can comfortably heat your entire home, while meeting all of your hot water needs. Inspired by the famous Reginald's Tower in Waterford, that has protected the city for almost 1,000 years, the Reginald is designed and hand built in Waterford to the highest standards of enduring craftsmanship.

## Did you know?

Using Stanley Eco Connect the Reginald will integrate with other traditional and renewable heat sources to become your complete home heating solution.

- Outside air capability as standard
- Unobstructed viewing glass
- Top or back flue outlet
- Large ashpan with cover for ease of disposal

### advanced features

# feel the warmth of a Stanley Stove

Over 300,000 Irish homes have chosen a Stanley Stove, here are some of their stories.

Roscommon based Sharon Duffy and her young family discovered how the Reginald Stove changed their home heating for the better.

Sharon lives in rural Roscommon and with her little boy Jamie (1) and another baby on the way. When the young family moved into the house in 2011, the

Reginald was installed to support an oil fired central heating system. *'It's completely transformed our lives'* said a smiling Sharon, sitting comfortably in front of her solid fuel Reginald Stove in Enamel Black. In one full year we've only had to buy 1½ fills of oil total! The Reginald stove heats up to 12 radiators, which was one of the main reasons Sharon and her husband chose this stove. *'We have a large number of radiators to heat and wanted to keep our heating bills down'*, Sharon explains.

*'Since having a family our social lives have changed, it's more about staying in now than going out! We wanted to create a focal point in our living room – the modern design of the Reginald allowed us to do that wonderfully. Whenever we have friends around the Reginald always comes up in conversation'*, Sharon recalls as she plays with a laughing Jamie in front of the flickering flames of their Reginald.

## what our customers say about their Stanley Stoves

*"it gives tremendous heat for a lot less fuel"*

*"with the stove you can only burn what you pay for"*

*"I didn't consider any others because it wouldn't be of the standard of Stanley. Stanley are top of the range."*

*"we had a big draught coming down the stairs, but I closed up the fire, put in the stove and now that draught is gone."*

*"it's one of the best things I ever put in the house."*

County Tipperary couple John and Rena Foxe are delighted with their Erin Stove, especially the amount of hot water they get from it.

John and Rena have four adult children and live in Mullinahone, Co. Tipperary. *'We decided we wanted to get full use from a Stanley Stove and installed an Erin with a boiler to heat the house'*, explained John. The Foxes also benefit from plentiful hot water. *'I can't believe the amount of hot water that we get from it'* said John as he describes what he loves about his Erin Stove.

*'We have definitely noticed a saving; we haven't had to turn on the oil as much. Our son uses a second sitting*

*room for study and the radiator in that room is piping hot meaning he doesn't have to light the fire in there'* explains John.

*'I love the heat that the stoves generate; it's a nicer type of heat than from radiators'* said John as he relaxes in his favourite chair in the couple's sitting room.

When Jean Evoy and her family moved from the countryside to Waterford City she had a very specific stove in mind – the Stanley Cara Insert Stove was the perfect fit!

Jean Evoy is delighted with her Cara Insert Stove she bought in the summer of 2012 in preparation of the winter. Jean explains why she chose a Stanley Stove, *"I didn't want a stove that would take over the room but I wasn't sure if there was one available. I saw the picture of the Cara Insert in a Stanley leaflet in the newspaper and looked it up online."*

Jean tells how of success in her search for the perfect stove, *"I was so excited; it was exactly what I wanted. When I went to see it in the shop they had one fitted in a fireplace and that was it, my mind was made up; if I couldn't have the Cara Insert I didn't want anything!"*

# Fionn®

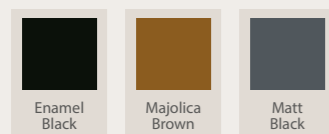

Drawing on successful designs from the past, this traditional box stove is one of only two in the Stanley collection, which offers an integrated hotplate. The elongated legs give this smaller stove the height of a larger model. The Fionn's unique design offers efficiency and economy in a compact solution. The viewing glass features a beautiful paned effect window with a burner control wheel for optimum heat control and comfort.

- Removable ash-pan
- Hotplate on top
- Top and rear flue outlet
- Air-wash facility to automatically clean stove window

## advanced features

-  **Clean Burn Technology** controls air flow in the stove firebox to maximise efficiency.
-  **High Chromium Grates** withstand higher firebox temperatures for a longer lifespan.
-  **Cast Iron Build** holds and radiates heat, giving an even temperature once the stove is lighting.
-  **Quality Fittings** are made from best in class materials and hand built in Waterford.
-  **Superior Grade Enamel** - a special enamel formulation is used on Stanley enamel stoves that gives a high gloss finish with longer lasting shine.

Heat outputs are based on laboratory testing. Solid fuel heat output figures are based on burning household coal, outputs may vary with other types of fuel. Calculations are based on average sized radiators (5ft x 2ft). Efficiency ratings quoted are net efficiencies as per EN13240 (third party results). ## installation:

Waterford Stanley want you to enjoy the maximum performance from your Stanley Stove. To ensure this, it is essential that they are installed correctly. We recommend using a suitably qualified installer. To assist you we have a nationwide network of service agents available, as well as a dedicated technical service helpline. When fitting your Stanley stove a range of cast iron pipes and bends are available for installation purposes. These are available in a choice of colours to suit your appliance.

## pipes and bends:

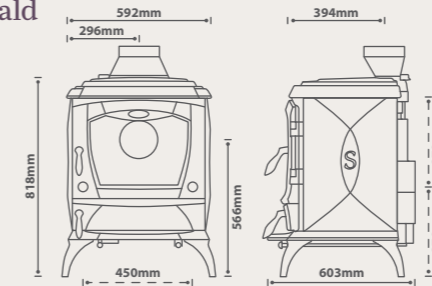

| PIPES        | Model  | 15½" (395mm) height 5" (125mm) straight pipe | 7¾" (200mm) height 5" (125mm) extension pipe | 16½" (418mm) height 6" (150mm) straight pipe (no access door) | 16½" (418mm) height 6" (150mm) straight pipe (with access door) | 34" (864mm) height 6" (150mm) straight pipe (with access door) |

# say hello to Stanley

Stanley has a network of Stanley Centres and independent Stanley Stove Stockists across the country. Visit one of these shops where friendly and expert staff will be happy to help you chose the right stove for you.

You can find your nearest retailer by visiting [www.waterfordstanley.com](http://www.waterfordstanley.com) or by telephoning 051 302 300. Our trained staff will give you friendly, first class service as well as helping you with technical queries. Most Stanley Centres feature full working models from the Stanley range displayed in classic and contemporary settings. Your local Stanley Centre provides an opportunity to experience up close, the distinctive Stanley combination of timeless character, elegant detailing and powerful performance.

## The range cooker experts

Controlled performance, efficiency at your fingertips, traditional craftsmanship and contemporary design all combine to make a Stanley range the modern choice for today's family home. Bringing warmth and character to Irish homes since 1934, Stanley ranges are loved as much for their cooking ability as their excellent build and efficient heating qualities. Radiant heat from all sides of the cast iron oven seals in flavour and its generous oven size provides for every table size and accommodates every occasion.

# a proud tradition

Stanley has been bringing warmth and comfort to homes for generations, stretching back to when the first range cooker was made in Waterford in 1934.

Stanley cookers were launched alongside Rayburn cookers in the 1920's - both were companions to the Livingstone cooker. Allied Ironfounders were the leading foundry company of the day. It owned sites in Larbert, Scotland, Coalbrookdale and Telford, England, together with the Waterford site.

In the 1960's the Waterford site was sold and evolved through the decades to become Waterford Stanley in the early 1980's. In 2005 Waterford Stanley was acquired by the AGA Rangemaster Group, once again reuniting the AGA, Rayburn, Falcon and Stanley families.

## Ireland's number one stove brand\*

The Stanley brand inspires instinctive loyalty and appeals strongly to Irish consumers. The sense of family, cosiness and a relaxed lifestyle are values that Stanley owners aspire to. Stanley meets these aspirations with its collection of expertly crafted, cast iron range cookers and stoves.

Designed, developed and manufactured in Ireland, Stanley employs over 100 people in Waterford city.

## Did you know?

Stanley's first factory in Waterford was set up in 1934 by Allied Ironfounders, the predecessor company to AGA, as a sister facility to its foundry in Larbert, Scotland.
