## Installation guidelines for door seal strips

1. Remove the old seal strip and clean the cast-iron surface for silicone, using a flat screwdriver or paint scraper.
2. Sweep or blow the surface clean and free from dust.
3. Apply a stripe of the supplied silicone in an even layer around the entire packing groove.
4. Carefully press the new strip into the silicone. Begin with the thick strip at the back of the door.
5. The pictures below illustrates a right- and left-hand door, respectively.

6. Close both doors and leave them closed for approximately 1 hour before using the oven.
